Re: **Zofran Shortage/Emergency Protocol Reglan**

Dr Charles Lane, WVEMS Regional Medical Director has implemented an emergency protocol for Reglan in the event that your drug box does not contain Zofran due to shortage.

Reglan (Metoclopramide) will be the anti-emetic used in the event that Zofran is not available at the time of restocking of the drug box. Dosing will be as follows:

Reglan 5mg/slow iv push; repeated once after 10 minutes if needed.
